

Academic University Parallel Programs

MDCC participates, along with all other Mississippi Community and Junior Colleges, in an articulation agreement with all Mississippi Institutions of Higher Learning, signed July, 2005. This agreement allows for over 160 prescribed areas of study, developed to allow ease of transfer from community colleges to the four year institutions. Below you will see the majors most frequently pursued by Mississippi Delta Community College students. These checklists are reflective of the courses guaranteed for transfer and graduation if followed. Students must consult with advisors in their area of study in order to stay on track toward successful transfer and graduation. However, all majors are available, through request, from the Office of Instruction or any MDCC academic advisor.
