

**MISSISSIPPI DELTA COMMUNITY COLLEGE
CAREER EDUCATION - AGRICULTURAL MECHANICS**

Agricultural Mechanics training at Mississippi Delta Community College is a course structured to help students gain knowledge through classroom instruction and to develop skills through shop experience.

Classroom work consists of the study of the parts and functions of the two and four cycle engine, the electrical system, and the three types of fuel systems (diesel, L.P. and gasoline), the power training, the hydraulic system, and the air conditioning system. Operation of the cotton picker and combine is also studied.

Shop work consists of experience in diagnosis, repair and overhaul of various types of farm equipment. In addition, students receive training in such areas as shop mathematics, stock control, shop management, and customer relations.
