## PEACE OFFICER STANDARDS & TRAINING

### FULL-TIME BASIC TRAINING PACKET MEMORANDUM

Dear Law Enforcement Administrator and Examining Physician:

This training packet contains a medical evaluation, a reimbursement supplement and an application for enrollment to the academy. Please complete all forms in accordance with the instructions below. Submit the completed packet (*pages 1 - 8*) to the academy at least two weeks prior to attending a training course (forms that have been completed six months or more prior to training cannot be accepted). With an increased awareness of the importance of physical fitness in the law enforcement profession, as well as in the overall maintenance of quality of life, the Board on Law Enforcement Officer Standards and Training (BLEOST) has enhanced fitness standards for law enforcement candidates. Students will be participating in vigorous physical fitness training and defensive tactics, as well as stress-related training (physical and mental), in such areas as driving, firearms and officer survival. Driving and firing events incorporate seasonal inclement weather with day and night sessions to further enhance stress-related training.

This medical examination report should provide an adequate evaluation of the physical condition of a law enforcement candidate and identify potential problem areas in each candidate's ability to successfully complete training. Agencies are urged to consider carefully any decision to enroll a student in training who has a potential problem. Students with weight problems, who have not been active in a physical fitness program or who have some medical difficulty, will have a greater probability of not completing the course. If at all possible, fitness levels should be at or above the minimum levels established in this packet prior to attending the basic course. **The procedures for completing these forms are as follows:**

## INFORMATION FOR THE PHYSICIAN CONTINUED

### Physical Fitness Requirements

The Board on Law Enforcement Officer Standards and Training (BLEOST), in recognizing the importance of physical fitness for academy performance and subsequent job performance, has established physical fitness training standards that must be achieved in order to successfully complete the training program. The board has established a test that effectively measures cardiovascular endurance and strength. An additional component of fitness, body weight and composition (% of body fat), has a great impact on the examinee's ability to perform the other tests. The evaluation of the candidate's fitness begins with a physician's examination and a determination of the ratio of fat to lean tissue. If an individual's weight exceeds the threshold weight, then a skinfolds caliper measurement should be taken to determine body fat percentage.

Beginning July 1, 1995, the BLEOST will require all board-approved training academies to administer an entry physical fitness test for those students reporting to the 10-week basic training program. The examination will be given immediately upon reporting for training and will determine whether a student can remain in the program. This test is an eligibility requirement. A passing score of 50% must be achieved. Those students who fail the examination must leave the academy. They may, however, resubmit their application to attend a future training class.

The test is comprised of four components: Flexibility, agility run, push-ups, and a 1½ mile run. It is the same test administered at the end of the program with one exception: The entry examination requires 50% to pass while the final test mandates 70%. This new requirement does not relieve students from participating in P.T. training once they pass the entry requirement. Trainees will continue to participate in scheduled P.T. training and must also pass a final P.T. test with a minimum score of 70% in order to graduate. It is important that all students understand this since even a physically fit person who has engaged in poor eating or drinking habits before reporting could fail the test.

Physical fitness can only be achieved over time. It requires a commitment to regular exercise and good eating habits. Thus it is important to disseminate this information so that all impacted personnel can prepare ahead of time. Scores needed to enter training and to graduate are as follows:
